

Sept. 2008

Dear Dr Rotunda,

There was quite a bit of apprehension on my part about having the MMS surgery. However after I met you your comforting "bedside manner" completely allayed all my fears.

The procedure was painless and so was the recovery. All went well.

I particularly want to thank you for your interest and concern for my well-being after surgery. I'm so impressed by your giving me info on where you can be reached personally 24/7.

Wishing you continued success.  
I am your grateful patient,
